

Top 8 Questions to Ask Your Doctor About Kidney Transplants

Deciding to get a kidney transplant is a big step.

To get started in making an informed decision, ask your doctor a few key questions.

- 1 Who can donate a kidney to someone in need?
- 2 Who can get a transplant?
- 3 What is a transplant center?
- 4 What can I expect from the evaluation process and how does my diabetes affect it?
- 5 How is kidney transplantation performed?
- 6 What should I expect after receiving a kidney transplant?
- 7 How do transplant patients pay for medications and post-transplant care?
- 8 What do I need to do to get and stay on the transplant waitlist?
