

State of Diabetes

Access and Affordability Survey – 2025

We asked advocates for their insights and perspectives on how the cost of managing diabetes and preventing obesity has impacted their daily lives, as well as the role that health insurance and access to care play in their health journeys. These responses play an important role in improving and shaping our advocacy programs.

VIRGINIA SURVEY RESULTS

HEALTH STATUS

56%

Households living with both **diabetes** and **excess weight**. Both conditions greatly increase the potential for complications such as heart disease, eye and foot damage and others.
