

## Stay Ahead of the Game with a Well Check

Schedule a preventive care visit with  
your primary care physician today.

### The Best Defense is a Good Offense

Routine health exams, tests, and screenings can help guard against certain health problems. CareSource wants you and your kids to stay as healthy as possible by getting a well check.

### Our Plans Have You Well-Covered

We provide members with Early and Periodic Screening, Diagnostic and Treatment (EPSDT). These are routine health visits that enable health care providers to identify and treat potential problems as early as possible. We cover medically-necessary care for issues found by an exam.

### Keeping Kids in Peak Condition

Your child's primary care physician (PCP) will work with you to make sure your child gets the care they need, including well check exams, vision and hearing tests, health education, lab testing, lead screening and more. The results can help you develop a plan for better health.

### Preventive Care is a Team Approach

Regular well checks can create strong, trusting relationships among physicians, parents and children. Use these visits to talk about development, behavior, sleep, nutrition, exercise, and self-care in person.

## The Ball's in Your Court

Earn rewards for wellness visits and some other preventive care activities.
