

Supporting our employees and their families by increasing awareness of the health risks and impact of diabetes and prediabetes, such as obesity and high blood pressure.

As a leader in the passenger transportation industry, Gray Line Tennessee is proud to be working with the American Diabetes Association (ADA) in support of research and treatment, with a specific focus on the impact of diabetes on Commercial Driver's License (CDL) holders. We are committed to creating a safe and healthy work environment, which includes addressing the unique risks of CDL holders.

In addition, the ADA plays an instrumental role in making sure that CDL holders with diabetes are treated fairly under Federal Regulations, which were changed in 2018 as a result of the ADA raising awareness on the issue on behalf of all commercial drivers.
